

Preparing for AI / GenAI

Interviews?

Most candidates prepare tutorials.

**Top candidates prepare systems
thinking.**

Swipe to see the complete AI interview
stack

AI FUNDAMENTALS • DSA • RAG • AGENTS •
SYSTEM DESIGN

AI / GenAI Interview Kit

What it covers:

Statistics for AI

Machine Learning concepts

Deep Learning fundamentals

NLP basics

Transformers (in depth)

LLM architectures

Prompt engineering

Fine-tuning techniques

Memory systems & vector databases

Backend & AI deployment

GenAI system design questions

Build strong AI foundations + system thinking

Check caption for interview kit

</> ENGINEERING CORE

DSA for AI Engineers

Inside the guide:

Time & Space Complexity

Optimizing AI models, pipelines, and deployments.

Core Data Structures

Essential structures used specifically for AI pipelines.

Extensive Question Bank

40 Core DSA Interview Questions • 40 Coding Problems

Practical Application

40 Scenario-based • 20 AI + RAG Project-Based Problems

DSA concepts tailored for AI engineering roles

RAG Interview Mastery

Structured into 4 volumes:

VOLUME 1

RAG Components & Architecture

VOLUME 2

RAG Tools & Frameworks

VOLUME 3

Production RAG Systems

VOLUME 4

Real-World RAG Use Cases

TOPICS INCLUDE

Chunking

Retrieval

Re-ranking

Evaluation

Scaling RAG

Check caption for interview kit

 **ADVANCED AI**

Agentic AI Interview Mastery

Also structured into 4 volumes:

VOLUME 1

Agent Fundamentals

VOLUME 2

Agent Frameworks & Tools

VOLUME 3

Production Agent Systems

VOLUME 4

Real-World Architectures

INCLUDES:

Single-agent systems

Multi-agent systems

Agentic RAG architectures

Everything you need to prepare for modern AI interviews.
